□ 3. Configured DNS Records

Type	Host	Value / Target	TTL
CNAME	url5552	sendgrid.net	5 min
CNAME	57014937	sendgrid.net	5 min
CNAME	em9412	u57014937.wl188.sendgrid.net	5 min
CNAME	s1._domainkey	s1.domainkey.u57014937.wl188.sendgrid.net	5 min
CNAME	s2._domainkey	s2.domainkey.u57014937.wl188.sendgrid.net	5 min
TXT	_dmarc	v=DMARC1; p=none;	60 min

□ 4. API Key Information

- Key Name: Tawveeri-Mail
- Access Type: Full Access (Mail Send)
- API Key:

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

- Status: Created successfully and stored securely (not yet shared with any party).

□ 5. Next Steps

1. Select an SMS service provider such as Twilio or Unifonic.
2. Share the API key with the technical team during the integration phase.
3. Activate a paid SendGrid and/or Twilio plan before official launch.

□ 6. Current Status

All domain and email configurations are complete and functional. SendGrid is ready for integration when the app development reaches the connection phase.
